FIREFLY BOARDS

ART DIRECTION WITH AESTHETIC BOARDS

I built an aesthetic asset board for Technicolor Fantastique, then used it to art-direct a posed portrait in Firefly Boards.

TECHNICOLOR FANTASTIQUE

THE PLAN

FROM REFERENCES TO FINAL IMAGE

The open canvas kept references, options, and decisions together as I art-directed one posed portrait.

- | | | | |
|----|----------------------------|----|------------------------------|
| 01 | Build the direction board | 02 | Select assets and palette |
| 03 | Load into Image References | 04 | Generate room options |
| 05 | Select a room | 06 | Compare character studies |
| 07 | Select a character study | 08 | Generate with the selections |
| 09 | Compare compositions | 10 | Choose and upscale the hero |

WHY BOARDS

The options and decisions stay visible together.

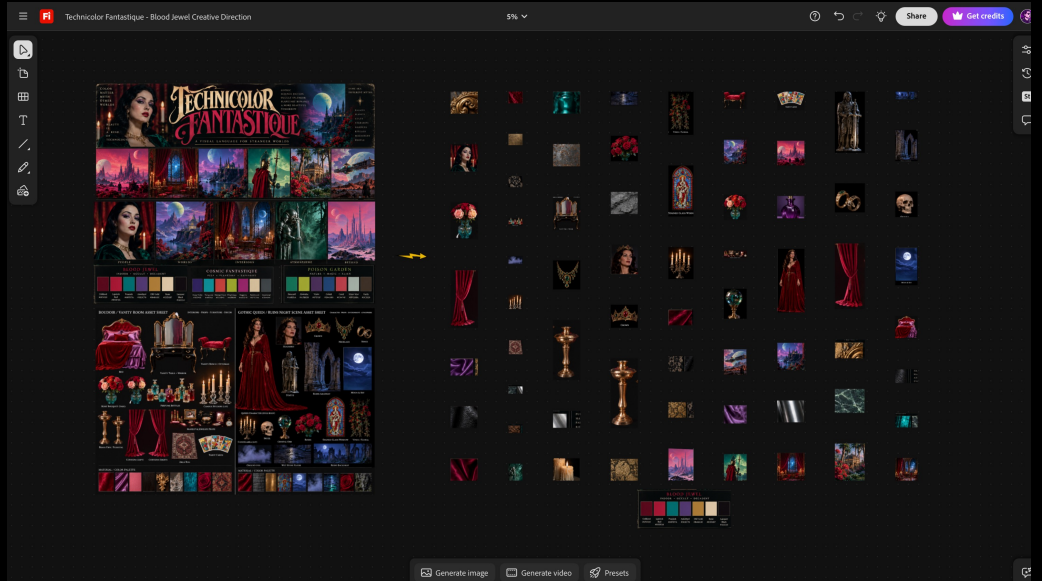

STEP 01 · DIRECTION

TECHNICOLOR FANTASTIQUE

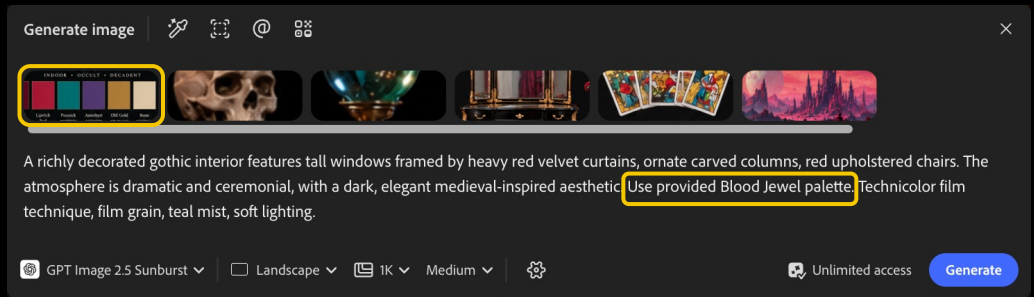

Technicolor Hollywood; 1950s–70s women’s pictures, melodramas and musicals; classic and Hammer horror; Giallo; 1960s pulp novels; and 1970s Gothic novel covers. I made AI image studies, asset sheets, and separate palettes from these influences as individual image-generation references.

STEPS 02-03 · ASSEMBLE THE REFERENCES

DRAG ASSETS FROM THE BOARD INTO IMAGE REFERENCES

The aesthetic board wasn't a single reference image. It was a working library of individual assets, studies, and palettes. I dragged the specific objects, environmental references, and Blood Jewel palette I wanted into Image References, then generated the room studies from that selected set.

WHAT THE SCREENSHOT SHOWS

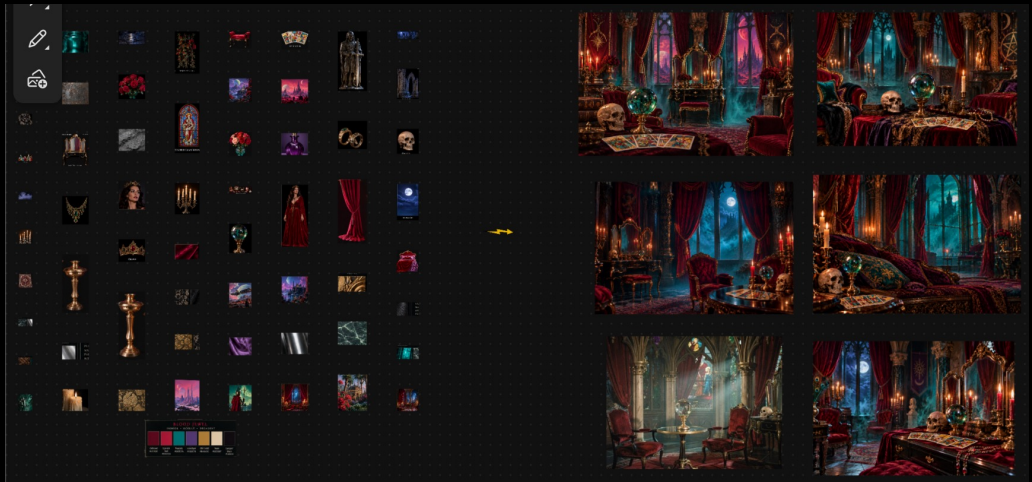

Six separate references loaded in one strip: the Blood Jewel palette card (outlined), skull, crystal ball, vanity furniture, tarot, and a scenic environment. The prompt calls for the palette by name: "Use provided Blood Jewel palette."

STEP 04 · EXPLORE

COMPARE ROOM OPTIONS

Using that selected reference stack, I generated six room drafts and compared composition, color, and mood.

ROOM PROMPT · SUMMARY

Create a richly saturated Gothic boudoir with oxblood velvet, peacock teal, amethyst, old gold, bone, and lacquer black. Include velvet furnishings, an ornate vanity, candles, roses, perfume, jewelry, and tarot. Balance warm candlelight with cool teal shadows.

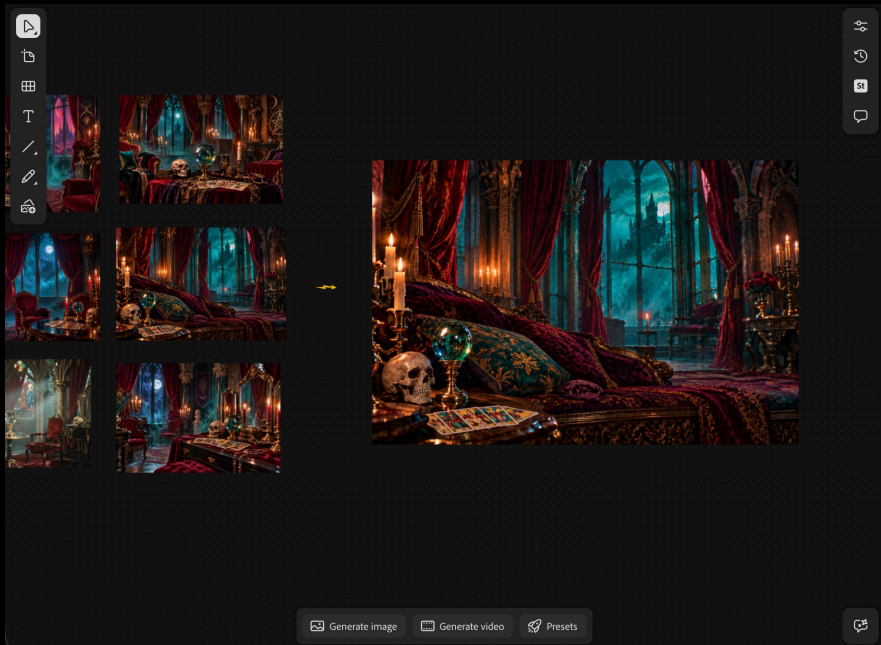

STEP 05 · SELECT

THE ROOM I SELECTED

I chose this interior as the setting for the gown studies and final portrait.

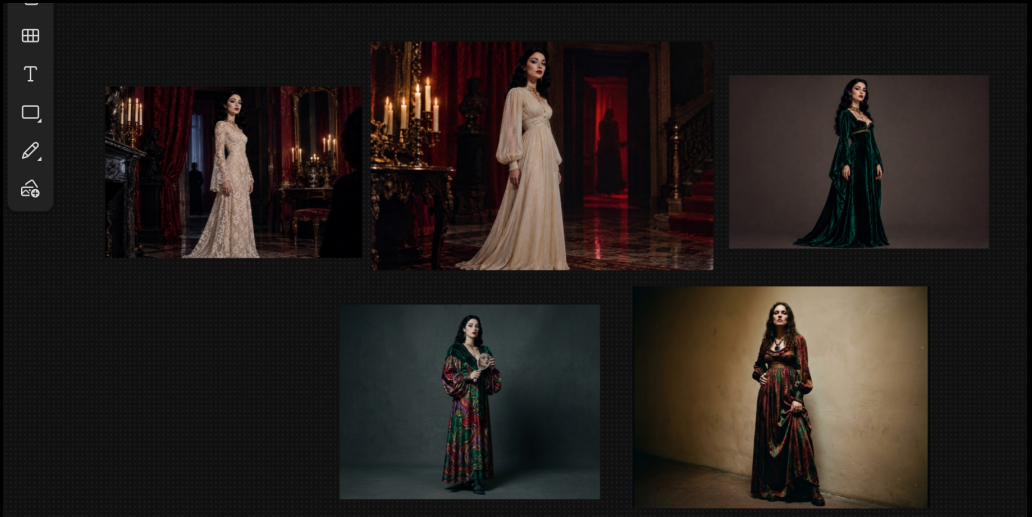

STEP 06 · EXPLORE

COMPARE CHARACTER STUDIES

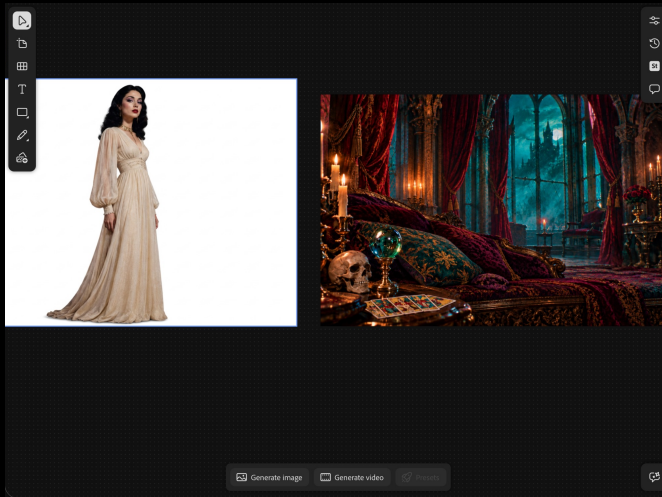

I compared five gown treatments against the selected room, looking for contrast in color, texture, and silhouette.

STEP 07 · SELECT

THE LOOK I SELECTED

I chose a version with a simple pale gown and strong contrast with the room, then isolated her from the background for new compositions.

STEP 08 · GENERATE

GENERATE FROM BOTH REFERENCES

I generated several variations from the selected room and character references, then compared the results on the board.

Prompt:

Sensuous spooky image of woman with tarot cards and skull on that lounge. Slight blur in foreground left. Slight blur in background. 1970s occult gothic horror photography, technicolor

STEPS 09-10 · SELECT

COMPARE GENERATED COMPOSITIONS

The reclining close-up gives the pale gown the clearest contrast with the room. I upscaled it with Firefly's Topaz Bloom model at 1080 and Low Creativity.
