SPECIMEN 7-B

TURN AN EXISTING PROJECT INTO A PULP MOVIE POSTER

A Firefly Boards workflow using something you already made — demonstrated with Specimen 7-B from MAKE A MONSTER!!

THE ESCAPE OF THE SPECIMEN!

THE PLAN

EIGHT STEPS. ONE POSTER.

A direct route from an existing image to finished key art — without rebuilding the project from scratch.

01 Start with an existing image

02 Use it as a reference

03 Isolate the subject

04 Simplify the asset

05 Build the city

06 Combine references

07 Pick + refine

08 Change the type hierarchy

ONE BOARD

The references, prompts, options, rejects, and final assets all stay in one visual workspace.

STEP 01 · REUSE

START WITH SOMETHING YOU ALREADY MADE

I started with the specimen containment image from the earlier MAKE A MONSTER!! / Specimen 7-B work, then turned it into a reference inside Boards.

DON'T START OVER

A finished image can become the source material for the next project.

STEP 02 · ISOLATE

EXTRACT THE MAIN SUBJECT

The short prompt worked better than the fussy version. The goal here is a clean, reusable subject — not a finished poster.

PROMPT

isolate largest creature

STEP 03 · SIMPLIFY

MAKE A REUSABLE PULP ASSET

Use the isolate as the next reference. Keep the anatomy recognizable, but simplify the rendering so it can travel into a new visual world.

SAME CREATURE

Cleaner silhouette. Bolder shapes. Easier to reuse.

STEP 04 · BUILD

MAKE THE SETTING SEPARATELY

Instead of asking one prompt to solve everything, I built the city first: a fictional late-1970s pulp eco-horror downtown with room for the monster.

SPLIT THE PROBLEM

Complex image? Build the environment and subject as separate decisions.

STEP 05 · COMBINE

STACK REFERENCES, THEN GENERATE

Bring the creature and city together as references. Generate multiple variations from the same setup instead of overworking the first result.

MAKE A FEW

Compare composition, scale, and story impact — then pick a favorite.

STEP 06 · REFINE

RECOMPOSE THE WINNER — DON'T RESTART

Once I picked the strongest direction, I asked for poster-ready composition and clearer title space while preserving the monster, crowd, palette, and chaos.

ONE NOTE. ONE FIX.

Refine the direction you already like instead of throwing it away.

STEP 07 · TYPE

CHANGE THE HIERARCHY, NOT THE ART

The first title treatment crowded the monster. I kept the illustration and changed the read: smaller setup at top, SPECIMEN 7-B as the payoff at the bottom.

BEFORE

AFTER

RECAP + YOUR TURN

BUILD SOMETHING NEW FROM SOMETHING YOU ALREADY MADE

You can use a creature from MAKE A MONSTER!! — or any character, object, illustration, or visual project you already have.

THE REAL SKILL

The useful part is not one cool output. It is keeping the good decisions and changing only what needs to change.
